

ReachAnother Foundation builds pediatric neurosurgical capacity in Ethiopia to save the lives of babies born with neural tube defects.

A Gift of Technology to Save Lives

Help us raise \$50,000 to purchase an ETV machine for our Center of Excellence in Bahir Dar!

Endoscopic Third Ventriculostomy or ETV, is a minimally invasive advanced surgical technique that dramatically lowers the risk of postoperative complications and prevents the need for future corrective surgeries.

Access to an ETV machine will go a long way towards reducing the long waitlists that families currently experience and give more children the chance to receive life-saving surgery.

HELP US REACH OUR GOAL

Koffee with Koning:

How partnerships help change the world

If you missed this fascinating discussion, do not fret!

You can now view it here:

Save the Date!

After a year hiatus, *Evening for Ethiopia* is back! We are excited to celebrate our achievements with you in person and work together to build a better future for children born with spina bifida and hydrocephalus.

Stay tuned for more details...

*Evening for Ethiopia
Time to Gather*

Saturday
October 23rd, 2021

Presented by:  **LADD GROUP**  **Cascade
Sotheby's
INTERNATIONAL REALTY**

We are thrilled to announce that [The Ladd Group](#) and [Cascade Sotheby's](#) are partnering as Title Sponsors to our *Evening for Ethiopia Gala for the second time. Thank you for your support!*

" The Ladd Group and Cascade Sotheby's International Realty are proud to support the fine work by this Bend-based non-profit that is affecting position change across the globe. "

Learn about the projected impacts that food fortification with folic acid could have.

This important article was written by Dr. Vijaya Kancherla of Emory University's Rollins School of Public Health with support from ReachAnother Foundation and Ethiopian partners.
